Android Studio Linux / Windows shortcuts

Window one project
Tool windows Project, Logcat, Run, Debug
Editor tabs; Esc returns here

CONCEPTS

Press Shift twice or Ctrl+Shift+A when you forget a key: both find any action or setting.

Keys shown are the default Linux/Windows keymap. On macOS Ctrl is mostly Cmd and Alt is Option; Run is Ctrl+R and Debug is Ctrl+D there. Linux desktops may grab some Ctrl+Alt keys.

Esc jumps back from a tool window to the editor; Shift+Esc hides it.
