Audacity Audio editor shortcuts

START HERE

- Space — Play / stop
- Ctrl + T — Trim to selection
- R — Record
- Ctrl + Z — Undo
- Ctrl + I — Split clip
- Ctrl + S — Save project
- Ctrl + K — Delete selection
- Ctrl + Shift + E — Export audio

Project one .aup3 file
Track mono or stereo lane
Clip movable piece of audio

CONCEPTS

Shortcuts are the Windows and Linux defaults. On macOS read Ctrl as Cmd and Alt as Option; Preferences is Cmd+, and Add Label at Playback Position is Cmd+.

Any shortcut can be rebound in Preferences > Keyboard; a Full shortcut set binds more commands than the Standard one.

Saving a project (.aup3) keeps all tracks and edits; Export Audio renders a final file such as WAV or MP3 and does not.

TRANSPORT

- Space — Play / stop
- R — Record
- P — Pause
- Shift + Space — Play once / stop
- X — Play / stop and set cursor
- Shift + R — Record on a new track
- Shift + D — Punch and roll record

- Ctrl + S — Save project
- Ctrl + Shift + E — Export audio
- Ctrl + Shift + I — Import audio
- Ctrl + W — Close project
- Ctrl + Q — Quit
- Ctrl + P — Preferences

RECIPES

Cut a section out

```
# select with F1 drag, or
Shift+J / Shift+K
Z        # snap to zero
crossings
Ctrl+K   # delete, later audio
shifts left
Ctrl+Z   # undo if it clicks
```

Trim a recording to the good part

```
# drag over the keeper
Z
Ctrl+T   # trim away the rest
Ctrl+Shift+E   # export
```

Mark and edit later

```
Space    # play
Ctrl+M   # drop a label at each
spot
Alt+Right   # jump to next label
Ctrl+I   # split there
```

Loop-check an edit

```
# select the area
Shift+L   # set loop to
selection
L        # loop play
Ctrl+R   # repeat last effect,
listen again
```
