Chrome DevTools Windows / Linux shortcuts

CONCEPTS

Shortcuts shown are for Windows and Linux. On macOS read Ctrl as Cmd and Alt as Option; Console clear is Cmd+K there, and F-keys need Fn.

Press Ctrl+Shift+P and type: most features, including screenshots and theme switches, are Command Menu entries.

Shortcuts only fire when DevTools has focus. To open DevTools, focus the page first.

DevTools window docked, undocked or in its own window

- **Panel** Elements, Console, Sources, Network
  - **Drawer** Escape shows Console, Search, Recorder below
