darktable Photo workflow shortcuts

Import film roll → *cull* → **Lighttable** rate, label, select → *D* → **Darkroom** edit, history stack → *copy / paste* → **Export** selected images

CONCEPTS

Keys act on the image under the mouse pointer; with none hovered they act on the selection.

Press H in any view to list the shortcuts active there. Everything is rebindable in preferences > shortcuts.

Edits are non-destructive: they live in the history stack and an XMP sidecar, never in the raw file.

Shortcuts are the defaults of the 5.6 / development manual; older releases can differ.

VIEWS

L
Lighttable: browse and cull

D
Darkroom: develop the image

T
Tethering: shoot from camera

M
Map: place images by GPS

S Slideshow

VIEWS (cont.)

P Print

Toggle right panel

RECIPES

Cull a shoot

```
# hover a thumbnail, then:
R   # reject blurry ones
2   # keepers: two stars
F3  # green = pick
X   # compare in culling
```

Reuse one edit on a batch

```
D       # open finished
image
Ctrl+C  # copy its history
# lighttable: select targets
Ctrl+V  # paste onto all
```

Sync a single tweak

```
# darkroom: tweak a module
Ctrl+F  # show filmstrip
Ctrl+A  # select all
Ctrl+X  # sync the tweak
```

Check focus fast

```
# lighttable: hover frame
Ctrl+W  # hold: focus areas
F       # sticky, Esc leaves
```
