darktable Photo workflow shortcuts

CONCEPTS

Keys act on the image under the mouse pointer; with none hovered they act on the selection.

Press H in any view to list the shortcuts active there. Everything is rebindable in preferences > shortcuts.

Import film roll
↓ `cull`
Lighttable rate, label, select
↓ `D`
Darkroom edit, history stack
↓ `copy / paste`
Export selected images

Edits are non-destructive: they live in the history stack and an XMP sidecar, never in the raw file.

Shortcuts are the defaults of the 5.6 / development manual; older releases can differ.
