eza Modern ls replacement

CONCEPTS

eza is a modern ls replacement: most ls flags (-l -a -R -r -d -1) work the same. Differences: sizes are human-readable by default, -h adds a header row (not human sizes), and -s sorts by a named field.

Pick entries dir or files
↓ `-a -D -f -I -L`

Order name by default
↓ `-s -r --group-directories-first`

Layout grid, -1, -l, -T
↓ `-h -g --git --time-style`

Decorate colour, icons
↓ `--color-scale --icons`

Colour, icons and hyperlinks default to auto: they switch off when output is piped. Force with --color=always or --icons=always.

LISTING

eza
List the current folder as a grid

eza *<path>*...
List given folders or files

eza -1
One entry per line

eza -a
Show hidden files

eza -R
Recurse into folders

eza -d *<dir>*
List a folder itself, not contents

LONG VIEW

eza -l
Permissions, size, owner, date

eza -lh
Add a header row

eza -lo
Octal permissions

TREE

eza -T
Tree of the current folder

TREE (cont.)

eza -T -L *<depth>*
Limit tree depth

eza -T -D
Tree of folders only

eza -T -I '*<glob>***|***<glob>***'**
Skip names matching globs

eza -T --git-ignore
Skip files ignored by git

eza -lT
Tree with long details

SORTING AND FILTERING

eza -s *<field>*
Sort by a named field

eza -r
Reverse the order

eza -s size -r
Largest first

eza -s modified
Oldest to newest

eza -s extension
Group by file extension

eza --group-directories-first
Folders before files

eza -D
Only folders

eza -f
Only files

eza -I '*<glob>***|***<glob>***'**
Ignore names matching globs

eza --git-ignore
Hide files listed in .gitignore

GIT AND TIME

eza -l --git
Git status column per file

eza -l --git-repos
Status of nested repositories

eza -l --time-style=*<style>*
default, iso, long-iso, full-iso, relative

COLOUR AND ICONS

eza --icons
Icons next to names
