irssi Terminal IRC client

START HERE

`/connect <network>`
Connect to a network

`/help <command>`
Built-in help

`/join #<channel>`
Join a channel

`/quit`
Leave Irssi

Ctrl + N / Ctrl + P
Next / previous window

Alt + 1-9
Jump to window

PgUp / PgDn
Scroll history

Tab
Complete nick or command

Network server connection
Window numbered, may be split on screen
Item channel or query inside a window

CONCEPTS

Text without a leading / goes to the active window; / <number> switches to window <number>.

/set and /toggle change settings in memory; /save writes ~/.irssi/config.

Alt+number needs a terminal that sends Alt as Meta; otherwise use /window goto <n> or Esc then the key.

Run Irssi inside tmux or screen to stay connected after you log out.

CONNECT

`/network`
List configured networks

`/connect <network>`
Connect to a network or server

`/server add -tls -network <net> <host> 6697`
Add a TLS server to a network

`/network add <net>`
Define a network

`/server list`
List servers

`/server modify -auto <host>`
Connect to it at startup

CONNECT (cont.)

`/server modify -noauto <host>`
Stop connecting at startup

`/network add -sasl_username <user> -sasl_password <pass> -sasl_mechanism PLAIN <net>`
Set SASL login for a network

`/disconnect <tag>`
Close a connection

`/reconnect <tag>`
Reconnect to a server

`/quit [<message>]`
Exit Irssi

CHANNELS & CHAT

`/join #<channel>`
Join a channel

`/part [<message>]`
Leave current channel

`/cycle`
Part and rejoin the channel

`/msg <nick> <text>`
Send a private message

`/query <nick>`
Open a private chat window

`/unquery`
Close the query

`/me <text>`
Send an action

CHANNELS & CHAT (cont.)

`/nick <newnick>`
Change your nickname

`/names`
List users in channel

`/whois <nick>`
Show info about a user

`/topic [<text>]`
Show or set the topic

`/away [<reason>]`
Mark yourself away; no argument returns

`/kick <nick> [<reason>]`
Kick a user

`/mode <target> <modes>`
Change channel or user mode

`/channel add -auto #<channel> <network>`
Autojoin a channel

NAVIGATION

Ctrl + N / Ctrl + P
Next / previous window

Alt + 1-9
Jump to window 1-9

Alt + Left / Alt + Right
Previous / next window

Alt + A
Go to the window with most important activity

NAVIGATION (cont.)

PgUp / PgDn Scroll chat

Ctrl + L Redraw the screen

Ctrl + X
Switch active server of the window
Useful in the status window with several networks.

`/window goto <n|name>`
Go to a window

`/window close`
Close the current window

`/window move <n>`
Renumber the window

`/window list`
List all windows

`/window last`
Go to previously active window

`/window new split`
Open a split window

INPUT LINE

Tab
Complete nick, command or setting

Up / Down
Browse input history

Ctrl + A / Ctrl + E
Start / end of line

Ctrl + W
Delete previous word

INPUT LINE (cont.)

Ctrl + U
Delete to start of line

Ctrl + K Delete to end of line

`/clear`
Clear the window

`/lastlog <pattern>`
Search the window buffer

HIGHLIGHTS & LOGGING

`/hilight <word>`
Highlight a word

`/ignore <nick>`
Ignore a user

`/unignore <nick>`
Stop ignoring

`/window hidelevel +joins +parts +quits`
Hide joins, parts and quits

`/set autolog on`
Log all chats to files

SETTINGS & SCRIPTS

`/set <key>`
Show settings matching key

`/set <key> <value>`
Change a setting

`/toggle <key>`
Flip a boolean setting

SETTINGS & SCRIPTS (cont.)
