irssi Terminal IRC client

CONCEPTS

Text without a leading / goes to the active window; /<number> switches to window <number>.

Network server connection
- **Window** numbered, may be split on screen
  - **Item** channel or query inside a window

/set and /toggle change settings in memory; /save writes ~/.irssi/config.

Alt+number needs a terminal that sends Alt as Meta; otherwise use /window goto <n> or Esc then the key.

CONNECT

/network
List configured networks

/connect *<network>*
Connect to a network or server

/server add -tls -network *<net>* *<host>* **6697**
Add a TLS server to a network
