Razor / selection tool

Ctrl + **Z**
Undo

Project Bin import clips | **Clip monitor** set zone I / O | **Timeline** V insert, B overwrite | **Project monitor** play, review | **Render** Ctrl+Return

CONCEPTS

Press Ctrl+Alt+I and type: every menu action is searchable, even ones without a shortcut.

The workflow: set a zone (I/O) in the clip monitor, then V inserts it into the timeline at the playhead, B overwrites.

Shortcuts are the defaults of 26.08 and are rebindable in Settings > Configure Keyboard Shortcuts (Ctrl+Alt+,).

PLAYBACK

Space Play / stop

K Pause

L
Play forward (press again to speed up)

J

Configure keyboard shortcuts

RECIPES

Rough cut from a long clip

```
# double-click clip in bin to open it
J / K / L   # scrub to the start
I           # zone in
O           # zone out
V           # drop it at the playhead
```

Trim a gap out

```
Space       # find the dead part
Shift+R     # cut at its start
Right x N   # step to its end
Shift+R     # cut again
S, click part # select the middle
Shift+Del   # extract, gap closes
```

Insert a shot mid-timeline

```
# set zone in the clip monitor
Alt+Right   # jump to the next snap point
V           # insert, later clips shift
B           # or overwrite instead
```

Quick export

```
Shift+Return # preview render for smooth playback
Ctrl+Return  # open the render dialog
# pick a preset, then Render to File
```
