khal Terminal calendar

CONCEPTS

khal only reads and writes local calendar files (vdir). Syncing with a server is done by a separate tool such as vdirsyncer.

VIEWING

khal list
Events of today

khal list *<start> <end>*
Events in a date range

khal list today *<n>***d**
Next n days (m, h, d work)

khal calendar
Three months with events

khal search *<text>*
Search events by text

CREATING

khal new *<start> <title>*
Add an event (default 1 hour)

khal new *<start> <end> <title>*
Add with explicit end

khal new *<date> <title>*
Add an all-day event

khal new *<start> <title>* **::** *<notes>*
Add with a description

new -a *<calendar>*
Target calendar (once only)

new -l *<place>*
Location
