kitty GPU terminal emulator

CONCEPTS

kitty_mod is Ctrl+Shift by default, so Ctrl+Shift+T is kitty_mod+t in the config. Change kitty_mod to move every default at once.

Windows are the splits inside a tab; the layout decides how they are arranged. Tabs and OS windows sit around them.

OS window Ctrl+Shift+N
- **Tab** Ctrl+Shift+T
  - **Window** a split with one shell

TABS

Ctrl + Shift + T
New tab

Ctrl + Shift + Right / Ctrl + Shift + Left
Next / previous tab
