Pick a tool B, V, T, Ctrl+R → **Hold a modifier** Shift add, Alt subtract, Ctrl replace → then **Drag on canvas** Space pans, Ctrl+Space zooms → then **Confirm** Enter applies, Esc cancels → after

CONCEPTS

Press Ctrl+Enter and type: any action without a shortcut can be found and run from the search box.

Rarely used tools have no default key. Assign your own under Settings > Configure Krita > Shortcuts.

Defaults listed are for Windows and Linux. On macOS Cmd replaces Ctrl for most keys.

Selection modifiers

RECIPES

Clean line over a sketch

```
# B pick brush, Ins new layer
# V then drag for straight
lines
# E toggle eraser to fix,
Ctrl+E merge down
```

Cut out and move part

```
# Ctrl+R select, Ctrl+J
duplicate layer
# Ctrl+T transform, Enter to
apply
# Ctrl+Shift+A deselect
```

Check proportions

```
# M mirror view, 5 reset
rotation
# 2 fit to window, Tab canvas
only
# M again to flip back
```
