lazydocker

Terminal UI for Docker

CONCEPTS

Keys depend on the focused panel: d removes a container, an image or a volume depending on where you are. Press x for the live menu.

Left: side panels, right: main view with tabs

Services is only filled when lazydocker runs in a directory with a docker-compose file; otherwise use Containers.

NAVIGATE

`Up` / `Down`
Move selection (also k / j)

`Left` / `Right`
Previous / next panel (also h / l)

`1-6`
Focus panel by number (1 projects ... 6 networks)

`[` / `]`
Previous / next tab of the main view

`Enter`
Focus the main panel

`Esc`
Return from the main panel

`/`
Filter the current list

`PgUp` / `PgDn`
Scroll the main view

`Plus` / `_`
Next / previous screen mode (normal, half, full)

`x`
Open the keybinding menu

`q`
Quit

CONTAINERS

`m`
View logs (also in Project panel)

`E`
Exec shell in the container

`r`
Restart

`s`
Stop

`p`
Pause

`a`
Attach to the container

`e`
Hide / show stopped containers

SERVICES

`u`
Up the selected service

`S`
Start the service

`U`
Up the whole project

`D`
Down the whole project

`R`
Restart options menu

Services also take d, s, p, r, a, m, E and w, like containers (d removes containers, not the service).

IMAGES, VOLUMES, NETWORKS

`d`
Remove the selected item (container, image, ...)

`b`
Bulk commands (prune unused ones)

`c`
Run a predefined custom command (any panel)
