lazydocker Terminal UI for Docker

CONCEPTS

Keys depend on the focused panel: d removes a container, an image or a volume depending on where you are. Press x for the live menu.

Left: side panels, right: main view with tabs

Services is only filled when lazydocker runs in a directory with a docker-compose file; otherwise use Containers.

NAVIGATE

Up / **Down**
Move selection (also k / j)

Left / **Right**
Previous / next panel (also h / l)

1-6
Focus panel by number (1 projects ... 6 networks)

[/ **]**
Previous / next tab of the main view

Enter
Focus the main panel

Esc
Return from the main panel

/
Filter the current list

PgUp / **PgDn**
Scroll the main view

Plus / **_**
Next / previous screen mode (normal, half, full)

x
Open the keybinding menu

q
Quit

CONTAINERS

m
View logs (also in Project panel)

E
Exec shell in the container

r
Restart

s
Stop

p
Pause

a
Attach to the container

e
Hide / show stopped containers

SERVICES

u
Up the selected service

S
Start the service

U
Up the whole project

D
Down the whole project

R
Restart options menu

Services also take d, s, p, r, a, m, E and w, like containers (d removes containers, not the service).

IMAGES, VOLUMES, NETWORKS

d
Remove the selected item (container, image, ...)

b
Bulk commands (prune unused ones)

c
Run a predefined custom command (any panel)
