lf Terminal file manager

CONCEPTS

Select Space, v, V
↓ y / d
Buffer copy or cut
↓ p
Paste into current dir

Copy, cut and delete act on the selection; with none, on the file under the cursor.

Press : to type a command; every key here is a map for one such command.

Press F1 for the built-in help; lf -doc prints the full documentation.

Defaults can be changed with map in lfrc; Windows uses cmd syntax for shell keys.

MOVE

j / k Cursor down / up

h / l Parent dir / enter or open

Arrows Same as h j k l

g › g Jump to top

G Jump to bottom

RECIPES

Config in ~/.config/lf/lfrc

```
# options
set hidden true
set icons true
set ratios 1:2:3
# own key
map D delete
```

Define a command

```
cmd mkdir ${{
  mkdir -p "$@"
}}
# use: :mkdir newdir
```

Act on the selection

```
cmd zipsel ${{
  zip out.zip $fx
}}
# $f file, $fs selected, $fx
selected or current
```

cd to last dir on exit

```
# shell: use the dir lf ended in
cd "$(lf -print-last-dir)"
```
