Lynx Text-mode web browser

START HERE

`lynx <url>`
Open a page

Space / b
Page down / up

Down / Up
Next / previous link

g
Go to a URL

Right / Enter
Follow link

/
Search page

Left
Back

q
Quit

Page rendered as text → `Down / Up` → **Link** highlighted → `Right / Enter` → **New page** stacked in history

CONCEPTS

> Lynx has no mouse pointer: the cursor jumps from link to link, and the highlighted link is the one you act on.

> Left goes back one page, Backspace opens the History list, V the list of visited links.

> Lynx shows no images or JavaScript; it is handy over SSH and for reading pages as plain text.

> Press ? or h inside Lynx for the built-in help, k for the key map.

NAVIGATION

Down / Up
Next / previous link

Right / Enter Follow link

Left Go back

Space / PgDn Page down

b / PgUp Page up

Use another config file

RECIPES

Page text to a file

```
lynx -dump -nolist https://
example.org > page.txt
```

Extract every link address

```
lynx -dump https://example.org |
sed -n '/^References/,$p'
```

Render a local HTML file on the terminal

```
lynx -dump -width=100 page.html
```

Pipe through a pager

```
lynx -dump https://example.org |
less
```
