Page rendered as text — **Down** / **Up** → **Link** highlighted — **Right** / **Enter** → **New page** stacked in history

CONCEPTS

Lynx has no mouse pointer: the cursor jumps from link to link, and the highlighted link is the one you act on.

Left goes back one page, Backspace opens the History list, V the list of visited links.

Lynx shows no images or JavaScript; it is handy over SSH and for reading pages as plain text.

Press ? or h inside Lynx for the built-in help, k for the key map.
