Midnight Commander

Two-panel file manager

CONCEPTS

Two panels: source and target

Copy and move go from the active panel to the other one; the dialog lets you change the target.

No function keys (terminal or desktop grabs them)? Press Esc, then 1-9 or 0 for F1-F10.

Enter runs the command line if you typed something; on an empty line it opens the file or directory.

FUNCTION KEYS

F3
View file

F4
Edit file

F5
