CONCEPTS

micro uses familiar desktop keys, not modes: just type, Ctrl+S saves, Ctrl+Q quits.

Press Ctrl+E for the command bar, then type a command such as set, vsplit or help. Tab completes.

Keys are written for Linux/ Windows terminals. On macOS Alt and Ctrl swap in line and word movement.

Function keys and some combos may not reach micro in every terminal. Run raw in the command bar to see what your terminal sends.
