mpc MPD command-line client

CONCEPTS

> mpc is only a remote control: the MPD daemon plays the music and keeps the queue, so playback goes on after mpc exits.

Music library database
↓ `add / findadd`
Queue current playlist
↓ `play`
MPD daemon plays
↓ `outputs`
Speakers audio output

PLAYBACK

mpc play [*<pos>*]
Play, optionally from a queue position

mpc pause
Pause playback

mpc toggle
Toggle play and pause

mpc stop
Stop playback

mpc next
Next song

mpc prev
Previous song
