mpv Keyboard media player

CONCEPTS

mpv has almost no visible UI: everything is a key. Hover the window to see the on-screen controller, or press ? for the list of bindings.

Command line options map 1:1 to mpv.conf lines (--fs becomes fs). Command line beats config, config beats built-in defaults.

PLAYBACK

Space / p Pause / resume

Left / Right
Seek back / forward 5 s

Up / Down
Seek forward / back 1 min

q Quit

Q Quit and remember position

Shift + Left / Shift + Right
Seek 1 s, exact
