Newsboat Terminal RSS reader

START HERE

- **Enter** Open feed or article
- **o** Open in browser
- **q** Back / quit
- **n** Next unread
- **r** Reload selected feed
- **Shift** + **A** Mark feed read
- **Shift** + **R** Reload all feeds
- **/** Search

Feed list all subscriptions → `Enter` **Article list** one feed → `Enter` **Article view** reading → `u` **URL list** links of the article

q steps back one level; Shift+Q leaves from anywhere

Filter expressions

Write	Matches
`unread_count > 0`	feeds with unread items
`title =~ "linux"`	regex, case-insensitive
`author =! "bob"`	not equal
`age between 0:7`	published in last 7 days
`tags # "news"`	word in a list
`a and (b or c)`	combine, group

CONCEPTS

Lower-case letters are plain keys; Shift+<letter> is the upper-case key. The same key can do different things in each view; ? shows the keys of the current one.

Feeds live in ~/.newsboat/urls (or ~/.config/newsboat/urls), settings in the config file next to it. On macOS the keys are the same.

FEED LIST

Enter Open the feed's article list

Shift + **R** Reload all feeds

r Reload the selected feed

Shift + **A** Mark selected feed as read

Shift + **C** Mark all feeds as read

l Toggle showing read feeds

Query feed of unread tech news

```
# in urls
"query:Tech unread:unread =
\"yes\" and tags # \"tech\""
```

Rebind keys vim-style

```
# in config
bind-key j down
bind-key k up
bind-key l open
bind-key h quit
```

Macro: open link 1 and mark read

```
# in config
macro 1 open-in-browser-and-
mark-read -- "open+read"
# then press , and 1
```

Cron-driven refresh

```
# crontab
*/30 * * * * newsboat -x reload
# check count
newsboat -x print-unread
```
