nnn Fast terminal file manager

Navigate j k h l | **Select** Space, a, mm | mark → | **Go to target dir** h l ~ - bookmarks | move there → | **Apply** p copy, v move, x delete | act →

CONCEPTS

nnn is a keyboard-driven file manager: it starts in the current directory and everything is a single key. Press ? inside for the live help.

Copy and move work on the selection: select files, change directory, then press p or v to paste them there. With nothing selected they act on the hovered entry.

Four contexts (tabs) 1-4 each remember their own directory, filter and sort.

Nothing leaves nnn into your shell by default. Set up the quit-to-cd wrapper (see Recipes) if you want ^G to change the shell directory.

RECIPES

cd on quit (bash/zsh)

```
# add to ~/.bashrc, then use 'n' instead of nnn
n() {
  export NNN_TMPFILE="${XDG_CONFIG_HOME:-$HOME/.config}/nnn/.lastd"
  nnn "$@"
  [ -f "$NNN_TMPFILE" ] && . "$NNN_TMPFILE" && rm -f "$NNN_TMPFILE"
}
```

Defaults and bookmarks

```
export NNN_OPTS="He"
export NNN_BMS="d:$HOME/Documents;D:$HOME/Downloads"
export NNN_PLUG="p:preview-tui"
export NNN_TRASH=1
```
