ShellCheck Shell script linter

CONCEPTS

> Every finding has an SC code. Search it on the ShellCheck wiki (github.com/koalaman/shellcheck/wiki/SC2086) for the reason and the fix.

Script file or stdin
↓ parse
Shell dialect -s, directive, shebang
↓ check
Findings SC code + severity
↓ filter
Report -f format, exit code

> Severity order is error, warning, info, style. Exit code 0 means clean, 1 means findings, 2 means a file could not be read.

RUNNING

`shellcheck <file>...`
Check one or more scripts

`shellcheck -`
Read the script from stdin

`shellcheck -x <file>`
Also follow files it sources

`find . -name '*.sh' -exec shellcheck {} +`
Check every script in a tree

`shellcheck --version`
Show the installed version

`apt install shellcheck`
Install on Debian/Ubuntu

`brew install shellcheck`
Install on macOS

DIALECT AND CHECKS

`-s <shell>`
Force sh, bash, dash, ksh or busybox

`-S <severity>`
Minimum level: error, warning, info, style

`-e <codes>`
Exclude codes, comma separated

`-i <codes>`
Report only these codes

`-o <names>`
Enable optional checks

DIALECT AND CHECKS (cont.)

`-P <dirs>`
Search path for sourced files

OUTPUT AND EXIT CODES

`-f tty`
Readable text with code excerpts (default)

`-f gcc`
file:line:col lines for editors

`-f json1`
Machine-readable JSON with a comments array

`-f diff`
Unified diff of automatic fixes

`echo $?`
Exit code: 0 clean, 1 findings

`SHELLCHECK_OPTS="--shell=bash -e SC2016"`
Default flags for every run

DIRECTIVES

`# shellcheck disable=SC2086`
Ignore a code for the next command

`# shellcheck disable=SC2034,SC2154`
Ignore several codes

`# shellcheck source=<path>`
Tell it which file a source loads

`# shellcheck source=/dev/null`
Do not follow this source

`# shellcheck source-path=SCRIPTDIR`
Look up sources next to the script

`# shellcheck shell=bash`
Set the dialect for this file

> A directive on its own line before the first command applies to the whole file; anywhere else it covers only the next command or block.

CONFIG FILES

`.shellcheckrc`
Project config, found in script dir or parents

CONFIG FILES (cont.)

`shell=bash`
rc: default dialect

`disable=SC2034`
rc: ignore a code everywhere

`external-sources=true`
rc: always follow sourced files

COMMON WARNINGS

SC2086
Quote $var to stop splitting and globbing

SC2046
Quote $(...) to stop word splitting

SC2068
Use "$@" instead of unquoted $@

SC2034
Variable assigned but never used

SC2154
Variable used but never assigned

SC2164
Use cd ... || exit in case cd fails

SC2155
Declare and assign separately

SC2162
read without -r mangles backslashes

SC2006
Use $(...) instead of backticks

SC2016
Single quotes do not expand variables

SC2012
Do not parse ls; use a glob or find

SC2002
Useless cat; redirect with < file

SC2015
A && B || C is not if-then-else

SC2181
Test the command directly, not $?

SC2148
Add a shebang or a shell directive

SC1090 / SC1091
Cannot follow source; use -x or a source= directive
