Slack Windows / Linux shortcuts

CONCEPTS

Keys are for the Windows and Linux desktop app. A few (Ctrl+K, Ctrl+O, Ctrl+Q) work only in the desktop app, not in the browser.

On macOS read Ctrl as ⌘ and Alt as Option. Exceptions: Home view is Ctrl+1 and More is Ctrl+0; Back/Forward are ⌘+[and ⌘+]; workspace switching by number is ⌘+number.

Workspace switch with Ctrl+number

Sidebar section channels, DMs, apps

Conversation messages and threads

Message actions (E, T, P, R...) work on a focused message: click it or arrow up to it first. They are plain letters, so they only fire when the message box is not focused.

NAVIGATE

Ctrl + K / Ctrl + T
Jump to a conversation

Ctrl + G
Search everything

Ctrl + F
Search in this conversation

Alt + Shift + Up / Alt + Shift + Down
