Sublime Text Windows / Linux shortcuts

Window one project or folder set
Group a pane with its own tabs
View one open file, many selections

CONCEPTS

Ctrl+P is the hub: add : for a line, @ for a symbol, # for a word after the file name.

Multiple selections are the core idea: edit many places at once, then press Esc to return to one cursor.

Shortcuts shown are for Windows and Linux. On macOS read Ctrl as Cmd and Alt as Option; some keys differ (multi-cursor, build cancel).

Chords like Ctrl+K Ctrl+B: press Ctrl+K, release, then Ctrl+B.

GENERAL
