Sublime Text Windows / Linux shortcuts

CONCEPTS

Ctrl+P is the hub: add : for a line, @ for a symbol, # for a word after the file name.

Multiple selections are the core idea: edit many places at once, then press Esc to return to one cursor.

Shortcuts shown are for Windows and Linux. On macOS read Ctrl as Cmd and Alt as Option; some keys differ (multi-cursor, build cancel).

GENERAL

Ctrl + Shift + P
Command palette

Ctrl + P
Goto Anything: open file

Ctrl + K › Ctrl + B
