Timewarrior Command-line time tracking

CONCEPTS

Time is recorded as intervals with tags. Only one interval is open at a time: starting a new one closes the running one.

No tracking timew shows none
↓ `start`
Open interval running, has tags
↓ `stop`
Closed interval @1 is the newest
↓ `summary :ids`
Correct / report move, tag, export

IDs like @1 count from the newest interval, so @1 is always the latest. Show them with the :ids hint.

Quote tags that contain spaces: 'Prepare Slides'. Unquoted words become separate tags.

TRACK

`timew start <tag>...`
Start tracking with tags

`timew stop`
Stop the running interval

`timew`
Show current tracking status

`timew start <time> <tag>`
Start at a past time

`timew continue`
Resume the last interval

`timew track <start> - <end> <tag>`
Log a closed interval

REPORTS

`timew summary`
Today's intervals and totals

`timew summary :ids`
Include @ids for corrections

REPORTS (cont.)

`timew summary :week`
This week

`timew summary :month`
This month

`timew summary <start> - <end>`
Any date range

`timew summary <tag>`
Only intervals with a tag

`timew export`
Intervals as JSON

CORRECT

`timew tag @<id> <tag>`
Add tags to an interval

`timew untag @<id> <tag>`
Remove tags

`timew move @<id> <time>`
Change the start time

`timew delete @<id>`
Remove an interval

`timew undo`
Revert the last command

DATES AND DURATIONS

`now / today / yesterday / tomorrow`
Named points in time

`9am / 8:12p / 15:30`
Clock times

`<start> - <end>`
Closed interval (or to)

`1.5h / 90mins / 2d`
Shorthand durations

HINTS AND CONFIG

`:ids`
Show interval IDs

`:week / :month / :quarter / :year`
Current period range
