Vifm vi-like file manager

START HERE

- **j** / **k** — Move down / up
- **yy** › **p** — Copy to other pane
- **h** / **l** — Parent / enter or open
- **dd** — Delete (to trash)
- **Tab** — Switch pane
- **/** — Search names
- **t** — Select file
- **:** — Command line

```
Left directory
```

```
Right directory
```

Left pane and right pane; Tab switches, p puts here

CONCEPTS

Vifm behaves like vi: normal mode for keys, : for commands, visual mode (v) for ranges. Two panes show two directories; copy and move work between them.

yy only marks files; the copy happens at p. Use P to move instead. Files you have selected with t or v are used instead of the file under the cursor.

Count prefixes work: 5j, 3dd, 12G or :12 jumps to entry 12.

Config lives in vifmrc (~/.config/vifm/vifmrc or ~/.vifm/vifmrc). Settings are :set commands, mappings are :nnoremap.
