Vifm vi-like file manager

CONCEPTS

Vifm behaves like vi: normal mode for keys, : for commands, visual mode (v) for ranges. Two panes show two directories; copy and move work between them.

Left pane and right pane; Tab switches, p puts here

yy only marks files; the copy happens at p. Use P to move instead. Files you have selected with t or v are used instead of the file under the cursor.

Count prefixes work: 5j, 3dd, 12G or :12 jumps to entry 12.
