VLC Media player hotkeys

CONCEPTS

Hotkeys act on the video or main window when it has focus; the Qt interface is assumed, and bindings can be changed in Preferences, Hotkeys.

Shortcuts shown are for Windows and Linux. On macOS many use Cmd instead of Ctrl (for example Cmd+O, Cmd+Up) and some differ, so check the menus.

Plain-letter hotkeys can be remapped; list yours in Tools, Preferences, Show All, Hotkeys.

Open media file, disc, stream
Playlist queue of items
Playback seek, speed, tracks
Output window, snapshot, record

PLAYBACK

Space Play / pause

S Stop

COMMAND LINE

vlc › *<file>* Play a file

vlc › *<url>*
Play a stream or network URL

vlc › -f › *<file>*
Start fullscreen

vlc › --start-time › *<sec>* › *<file>*
Start at a time in seconds

vlc › --stop-time › *<sec>* › *<file>*
Stop at a time in seconds

vlc › --no-video › *<file>*
Play audio only

vlc › --loop › *<files>*
Loop the whole playlist

vlc › -I › *<module>*
Pick the interface module

vlc › *<a>* ›
:start-time=<sec> › *<b>*
Option for one item only

vlc › --help List options

RECIPES

Listen to a video's audio only

```
vlc --no-video lecture.mp4
```

Play a clip from 1:30 to 2:00

```
vlc --start-time 90 --stop-time
120 movie.mkv
```

Different start per file

```
vlc a.mp4 :start-time=10
b.mp4 :start-time=60
```

Loop a playlist fullscreen

```
vlc -f --loop ~/Videos/*.mp4
```
