WezTerm GPU terminal, Lua config

Window one OS window
Tab a row in the tab bar
Pane one shell in a split

CONCEPTS

These are the default bindings on Linux and Windows; your wezterm.lua can change or disable any of them.

On macOS the Super key is Cmd: Cmd+T, Cmd+W, Cmd+C, Cmd+V, Cmd+F, Cmd+K work as usual, and Cmd+1-9 jumps to a tab.

Config is a Lua file, reloaded automatically when saved. Ctrl+Shift+R forces a reload.

TABS

Ctrl + Shift + T New tab

Ctrl + Shift + W
Close tab (asks first)

Ctrl + Tab / Ctrl + Shift + Tab
Next / previous tab

Ctrl + Shift + 1-8
