WezTerm GPU terminal, Lua config

CONCEPTS

These are the default bindings on Linux and Windows; your wezterm.lua can change or disable any of them.

On macOS the Super key is Cmd: Cmd+T, Cmd+W, Cmd+C, Cmd+V, Cmd+F, Cmd+K work as usual, and Cmd+1-9 jumps to a tab.

Config is a Lua file, reloaded automatically when saved. Ctrl+Shift+R forces a reload.
