# Windows Terminal

Tabbed Windows terminal

## CONCEPTS

A profile is one shell plus its look: PowerShell, Command Prompt, each WSL distro. New tabs and panes open a profile.

**Window** named or numbered; wt -w targets it

- **Tab** one entry in the tab row
  - **Pane** one profile's shell in a split

Keys shown are the shipped defaults. A fresh settings.json also adds Ctrl+C copy, Ctrl+V paste and Alt+Shift+D duplicate pane.

## TABS

Ctrl + Shift + T
New tab, default profile

Ctrl + Shift + 1-9
New tab with profile 1-9

Ctrl + Shift + Space
Open the new-tab dropdown

Ctrl + Tab / Ctrl + Shift + Tab
Next / previous tab

Ctrl + Alt + 1-8
Jump to tab 1-8

Ctrl + Alt + 9 Jump to last tab

Ctrl + Shift + D Duplicate tab

Ctrl + Shift + N New window

Alt + F4 Close window

closeTab has no default key: Ctrl+Shift+W closes the tab once its last pane is gone.

## PANES

Alt + Shift + Plus
Split: new pane to the right

Alt + Shift + Minus
Split: new pane below

Alt + Shift + D
Duplicate pane, longest side

Alt + Arrows
Move focus to neighbour pane

## PANES (cont.)

Ctrl + Alt + Left
Focus last used pane

Alt + Shift + Arrows
Resize focused pane

Ctrl + Shift + W
Close pane (or tab if only one)

Alt + Click
New-tab button: open as pane

Zoom, swap, move to another tab, read-only and broadcast input have no keys; run them from the palette or bind togglePaneZoom, swapPane, movePane.

## CLIPBOARD AND SELECTION

Ctrl + Shift + C / Ctrl + Insert
Copy selection

Ctrl + Shift + V / Shift + Insert
Paste

Enter Copy the active selection

Ctrl + Shift + A
Select the whole buffer

Right-click
Copy selection, else paste

Alt + Drag
Block (rectangle) selection

Shift + Arrows
Grow selection by a character

## MARK MODE

Ctrl + Shift + M
Toggle mark mode (keyboard select)

Arrows Move the cursor

Ctrl + Left / Ctrl + Right
Move by word

## SCROLLBACK AND SEARCH

Ctrl + Shift + Up / Ctrl + Shift + Down
Scroll one line

## SCROLLBACK AND SEARCH (cont.)

Ctrl + Shift + PageUp / Ctrl + Shift + PageDown
Scroll one page

Ctrl + Shift + K
Clear screen and scrollback

Ctrl + Shift + F
Search the pane's buffer

## WINDOW AND VIEW

Ctrl + Shift + P
Command palette

Ctrl + , Open the Settings UI

Ctrl + Shift + ,
Open settings.json

Ctrl + Plus / Ctrl + Minus
Bigger / smaller font

Win + `
Quake mode: drop-down window

## WT.EXE COMMAND LINE

`wt`
Open a window, default profile

`wt -p "<profile>"`
Open with a named profile

`wt -d <dir>`
Start in a directory

`wt -w 0 nt`
New tab in the latest window

In PowerShell escape the separator as `; (or put --% after wt). From WSL run cmd.exe /c wt.exe and use \;.

## SETTINGS.JSON ACTIONS

actions defines what to run (command + id); keybindings maps keys such as ctrl+alt+plus to an id.

```
{ "keys": "ctrl+shift+z",
"id":
"Terminal.TogglePaneZoom" }
```

Bind a built-in action
